

MEDIA FACT SHEET

Connecting security officers for safer streets.

OnSiren is an urban intelligence platform connecting security officers with local information and each other. The app combines push-to-talk, first-hand incident alerts and local briefings. Alpha One, the AI in the system, helps users explore information about the places they protect.

The OnSiren app

Talk to nearby security officers across employers. Share first-hand alerts. Voice captions and translation into English support communication.

Alpha One

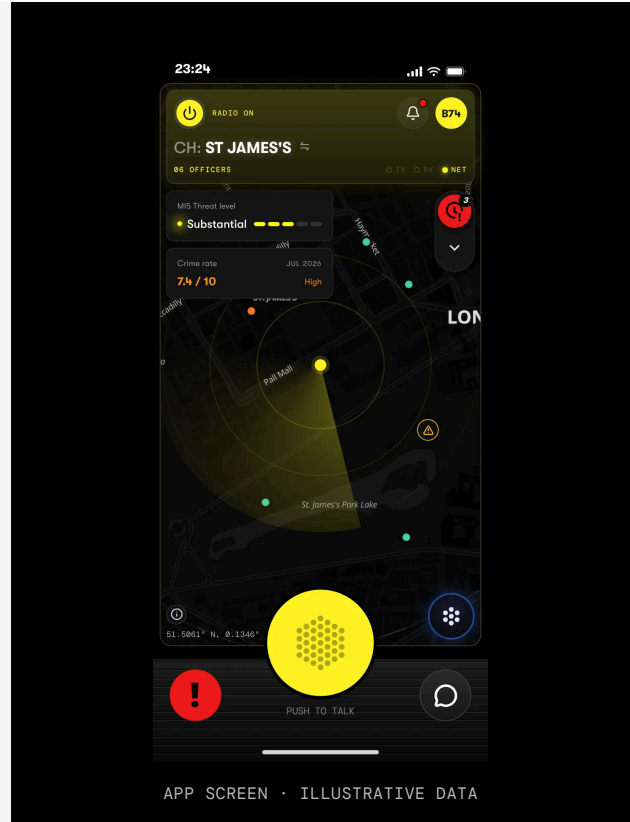

Ask about local conditions, explore available information and get help preparing a briefing. Relevant alerts keep users informed.

Eagle Eye

A threat intelligence dashboard for a place: local reports, transport disruption, events and recorded crime. Coverage varies by source and location.

OnSiren for Business

Bring teams and providers into a shared view. Private channels support communication, incident reporting and coordination across sites.

Police and local authorities

Can request access for local advisories, missing-person appeals and lookout notices. Access is subject to verification and agreed permissions.

Privacy and safety

Policies, sharing rules and a route to raise questions.
